

# NEWMONT™ NOTES

Community news provided by Newmont Mining Corporation

## Long Canyon Update

The public recently responded with 34 letters in regards to the Draft Environmental Impact Statement (DEIS) for the Long Canyon Project. Of the 34 letters, 17 expressed support for the North Alternative site plan going forward as analyzed. The remaining letters expressed concerns to some degree or made suggestions on how the project could be improved.

Once all comments have been reviewed and responded to, the Bureau of Land Management will issue a Record of Decision for the Long Canyon Project's Final Environmental Impact Statement. In addition to receiving the Record of Decision, Newmont must also obtain several State permits prior to commencement of construction activities.

Four state permit applications for the Project were submitted to the Nevada Division of Environmental Protection (NDEP) in March, April and May, which included the Class III Waivered Landfill Permit, Water Pollution Control Permit, Reclamation Permit and Dam Safety Permit. Approval of the Class III Waivered Landfill was received from the Bureau of Waste Management in April. The other permit applications are pending approval. Currently, work is ongoing in preparing several other additional Nevada State permit applications, which include the air, stormwater, septic, potable water, and Elko County building. Newmont anticipates having all state permits approved by the end of December.

## Summer Hydration

Summer is here and it's getting HOT, so stay hydrated! Hydration is critical to your health. Water, the most important nutrient you need, is often the most forgotten one. Water is essential for maintaining body temperature, because it carries heat away from your internal organs, through your blood stream, and out to your skin, resulting in sweat which in turn cools you off on the outside.

Below are some tips to help you stay hydrated this summer:

Plan ahead and pack. Always have water with you!

"Mix it up."

Add fresh fruit to your water bottle for flavor.

Increase your fruit and veggie intake, as those foods contain healthy doses of water!

Limit your intake of caffeine and alcohol, both of which will actually dehydrate you.

Drink a glass of water before and between meals.

Drink plenty of water during exercise or sports activities.

## June Blood Drive

Yet another successful Red Cross Blood Drive took place in Wendover in late June. Newmont donated refreshments and snacks to the event. It's nice to see

the Wendover community get involved with such a great cause, and Newmont enjoys being a part of that with them.

## 4th Of July Celebrations!

Newmont's recent donation to the Wendover 4th of July committee went towards organizing a fun-filled day of celebration. Complete with a kids' run and ride, 5k race, parade and a grand fireworks display, it was a memorable time for all during the Wendover 4th of July activities!

Wendover children enjoying the run & ride.

5k participants

Magnificent firework show to wrap up the day!

A float in the parade displaying Nevada pride.
